

OVERVIEW · AI CAPABILITIES

One model is not enough. Each task gets the right one.

Reading, seeing, hearing, speaking and translating are different jobs. PaperOffice picks the right tier per job.

EIGHT CAPABILITIES

You describe the goal, the platform picks model and tier. Every result with confidence and a log.

EIGHT CAPABILITIES

What the platform understands.

Every capability has its own page with flow, limits and price.

IDP agents

Fields and tables from documents, across nine processing tiers.

Datasheet (PDF) · [paperoffice-ai-datasheet-idp-intelligent-document-processing.pdf](#)

AI-OCR

Text, layout and position from scans, photos and PDFs.

paperoffice.ai/en/ai-ocr-text-recognition-llm-document-digitization
Datasheet (PDF) · [paperoffice-ai-datasheet-ocr.pdf](#)

Image recognition

Detect and describe objects, scenes and text in images.

paperoffice.ai/en/ai-image-recognition-ocr-object-detection
Datasheet (PDF) · [paperoffice-ai-datasheet-image-recognition.pdf](#)

Translation

Translate documents and text with context awareness.

paperoffice.ai/en/ai-translate-translator-llm-context-aware-translation
Datasheet (PDF) · [paperoffice-ai-datasheet-translate.pdf](#)

Speech synthesis

Turn text into natural speech, in many languages.

paperoffice.ai/en/ai-voice-tts-text-to-speech-voice-synthesis-tts
Datasheet (PDF) · [paperoffice-ai-datasheet-voice-tts.pdf](#)

Speech recognition

Turn recordings and calls into searchable text.

QUESTIONS ABOUT CAPABILITIES

How model selection works.

Do I have to pick a model?

No. You pick the processing depth or agent tier and the platform assigns the model. If you prefer, you can set the tier per job.

Where do the models run?

In our own European data center. Nothing is passed to a US cloud.

Can I compare results?

Yes. You can run the same job at different tiers and compare the results side by side.

Why several tiers?

A simple receipt needs less than a 40-page technical drawing. Tiers keep cost and accuracy in a sensible ratio.

Do I get confidence values?

Yes. Recognition and extraction return a confidence value per field plus its source location in the document.

What does each tier cost?

Prices are on the pricing page and on the relevant product page, always per page or per unit.
