

[OVERVIEW](#) • [SOLUTIONS BY INDUSTRY](#)

Your documents know your industry. Ours do too.

Every industry has its own documents, deadlines and checks. The path through PaperOffice stays the same.

18 INDUSTRIES

Pick your industry and see which documents come up there and how PaperOffice processes them.

18 INDUSTRIES

Where PaperOffice works today.

Each page shows the typical documents, the flow and the building blocks behind it.

Banking and finance

Statements, evidence and review paths with a complete audit trail.

paperoffice.ai/en/solutions/industry/ai-finance-banking-document-automation

Insurance

Claims, policies and applications read, checked and assigned.

paperoffice.ai/en/solutions/industry/ai-insurance-claims-processing-automation

Tax advisory

Client documents sorted, extracted and filed on time.

paperoffice.ai/en/solutions/industry/ai-tax-consultants-accounting-document-management

Manufacturing

Delivery notes, test records and technical documents within reach.

paperoffice.ai/en/solutions/industry/ai-manufacturing-production-document-automation

Logistics

Freight papers, customs documents and delivery notes without typing.

paperoffice.ai/en/solutions/industry/ai-logistics-supply-chain-document-management

Energy

Billing, contracts and meter data with deadlines in view.

paperoffice.ai/en/solutions/industry/ai-energy-utilities-document-automation

Healthcare

Findings and forms with redaction and strict access rights.

paperoffice.ai/en/solutions/industry/ai-healthcare-medical-document-management

Real estate

Leases, service charges and property files in one place.

paperoffice.ai/en/solutions/industry/ai-real-estate-property-document-automation

Public sector

Cases and files with retention, redaction and a log.

paperoffice.ai/en/solutions/industry/ai-public-sector-government-document-management

Legal and law firms

Deadlines from pleadings, one file per mandate and answers with sources.

paperoffice.ai/en/solutions/industry/ai-legal-law-firms-document-management

18 INDUSTRIES · 2/2

Retail and e-commerce

Supplier invoices, warning letters and contracts, in English and Chinese too.

paperoffice.ai/en/solutions/industry/ai-retail-e-commerce-document-management

Crafts and construction

Progress invoices, change orders and guarantees per project, handwriting too.

paperoffice.ai/en/solutions/industry/ai-crafts-construction-document-management

IT and software

Subscriptions, data processing and security questionnaires with deadlines and sources.

paperoffice.ai/en/solutions/industry/ai-it-software-document-management

Consulting and services

Statements of work, change requests and travel receipts per project.

paperoffice.ai/en/solutions/industry/ai-consulting-services-document-management

Education and research

Grant agreements, report deadlines and procurement per funded project.

paperoffice.ai/en/solutions/industry/ai-education-research-document-management

Associations and non-profits

Statutes, grants and member mail with deadlines in view.

paperoffice.ai/en/solutions/industry/ai-associations-non-profit-document-management

Automotive and mobility

Damage reports, insurer reviews and sales contracts per vehicle, cuts found fast.

paperoffice.ai/en/solutions/industry/ai-automotive-mobility-document-management

Hotels and restaurants

Event contracts, inspection reports and allotments with deadlines in view.

paperoffice.ai/en/solutions/industry/ai-hotels-restaurants-document-management

QUESTIONS ABOUT INDUSTRY SOLUTIONS

What stays the same in every industry.

Do I need a dedicated project for my industry?

No. The platform is the same; only document types, deadlines and checks differ. You describe those in plain words instead of having them programmed.

How long does it take to start?

You upload documents and see the result right away. Going live adds workspaces, permissions and workflows, which is configuration rather than development.

Can we connect existing systems?

Yes. Through connectors for servers, cloud storage and business systems, through the REST API, or through MCP for AI tools.

My industry is not on the list. What now?

The 18 pages show common cases, not a limit. What matters is the document type, not the sector. Talk to us if you are unsure.

Does the data stay in the EU?

Yes. Processing and filing run in our own European data center, without a US cloud. Alternatively the files stay on your own storage through storage mounts, and PaperOffice keeps metadata, index and results. The audit trail records who saw what and when.

What happens with unclear documents?

They go to human review instead of quietly passing through. Every field carries a confidence value and its source location.
