

[OVERVIEW](#) • [MODULES OF THE AI-DMS](#)

One system, many modules. You enable what you need.

Every module works on the same document in the same workspace. No second system, no second archive.

[TWELVE MODULES](#)

Here is which module takes which part of the work and where it fits into the flow.

TWELVE MODULES

What the platform can do.

From filing to audit trail: every module has its own page with flow, capabilities and limits.

AI-DMS

The platform: documents, processing depth, permissions and filing.

paperoffice.ai/en/ai-dms-document-management

Workspaces

One workspace per task, with the matching security tier.

paperoffice.ai/en/ai-workspaces-security-tiers-document-protection
Datasheet (PDF) · [paperoffice-ai-datasheet-workspaces.pdf](https://paperoffice.ai-datasheet-workspaces.pdf)

Storage mounts

Your storage stays yours, PaperOffice processes it in place.

paperoffice.ai/en/ai-storage-mounts-cloud-storage-connections
Datasheet (PDF) · paperoffice-ai-datasheet-storage-mounts.pdf

Connectors

SFTP, S3, WebDAV, reverse SSH and the scanner inbox as document sources.

paperoffice.ai/en/ai-connectors-integrations-api-interfaces
Datasheet (PDF) · paperoffice-ai-datasheet-connectors.pdf

Classification

Type, direction, language and sender recognised without training.

paperoffice.ai/en/ai-classification-and-automatic-categorization
Datasheet (PDF) · paperoffice-ai-datasheet-classification.pdf

Entities

People, companies and numbers linked across documents.

paperoffice.ai/en/ai-entities-named-entity-recognition-ner-extraction
Datasheet (PDF) · paperoffice-ai-datasheet-entities.pdf

Human review

Uncertain fields go to review instead of quietly passing.

paperoffice.ai/en/ai-human-in-the-loop-validation-and-quality-control

Smart search

Find content and meaning, not just file names.

paperoffice.ai/en/ai-smart-search-semantic-document-search
Datasheet (PDF) · paperoffice-ai-datasheet-smart-search.pdf

Knowledge graph

Connections between documents, cases and the people involved.

paperoffice.ai/en/ai-knowledge-graph-semantic-search
Datasheet (PDF) · paperoffice-ai-datasheet-knowledge-graph.pdf

Knowledge base

Verified knowledge as an answer source for agents and team.

paperoffice.ai/en/ai-knowledge-base-documentation-help-center
Datasheet (PDF) · paperoffice-ai-datasheet-knowledge-base.pdf

TWELVE MODULES · 2/2

Document chat

Ask questions of one document or a whole workspace.

paperoffice.ai/en/ai-document-chat-rag-questions-answers

Datasheet (PDF) · [paperoffice-ai-datasheet-document-chat.pdf](#)

Audit center

Who saw, changed and approved what, and when.

paperoffice.ai/en/ai-audit-center-compliance-logging

Datasheet (PDF) · [paperoffice-ai-datasheet-audit-center.pdf](#)

QUESTIONS ABOUT THE MODULES

How the modules work together.

Do I have to book every module?

No. The platform ships the core functions; you enable further modules when you need them. Prices are on the pricing page, not on the module pages.

What is the difference between a module and an agent?

Modules are platform capabilities. Agents are flows that use those capabilities one after another, following your rules.

Can we start small?

Yes. One workspace, one document type, one flow. Further modules come later without rebuilding what exists.

Do the modules work on the same document?

Yes. Classification, extraction, review, search and filing run on the same object in the same workspace, with one shared audit trail.

Is everything available through the API?

Most modules, yes. Where there is no public REST endpoint, the module page says so openly.

Where do I see the limits?

On every module page: what the module does, how it runs and what it cannot do.
